Relevant Experience

Web Designer June 2023–Present
Seichem Technologies Pvt. Ltd Chennai, TN

- Developed wireframes and designed user-friendly interfaces for 3 company websites; successfully built and deployed them using WordPress with a focus on responsive design, usability, and performance.
- Designed engaging social media creatives, marketing banners, wall posters, and managed branded social media handles to strengthen digital presence and audience engagement.
- Created detailed 2D and 3D wire and cable product designs for catalogs, presentations, and promotional materials, ensuring visual precision and brand consistency.
- Collaborated with marketing and product teams to translate business requirements into effective visual and web solutions.
- Leveraged tools including Figma, Adobe Photoshop, Illustrator, CorelDRAW, Canva, and WordPress to deliver high-quality design and web development projects.

Web Developer Intern February 2023–April 2023
Skill Vertex Bangalore, KA

- Built and maintained the backend of a hospital management web application using PHP and MySQL, implementing modules for patient records, appointment scheduling, and billing.
- Enhanced UI/UX elements with WordPress and Figma while ensuring responsive and user-friendly interfaces.
- Collaborated with the development team to integrate databases, optimize load times, and improve system functionality.

Projects

An Empowered Secure Cloud Storage using Dignifiable Access Control System against Malevolent Data Publishers.

- This project focuses on enhancing the security and sanitization of cloud data to protect against malicious data publishers. Aimed to ensure secure cloud storage by implementing robust protective measures. This initiative addresses potential threats to data integrity and confidentiality in cloud environments.

Demand-Est AI powered Food Demand Forecaster

- AI-driven food demand forecasting in specific regions, helping predict future consumption needs.
- By providing accurate forecasts, it helps reduce food wastage by 13% and optimize resource allocation which increases productivity by 8%. This ensures efficient management of food supplies, benefiting both vendors and consumers.

Certifications and Achievements

- **Google UX Design Professional Certificate**
